Accusonus releases **Beatformer**: All-In-One Beat Sculpting Plug-In

MAY 29, 2018 - [Accusonus Inc.](#), developers of music software tools based on artificial intelligence technology and makers of the critically-acclaimed beat-making plug-in **Regroover** announce the immediate release of [Beatformer](#). **Beatformer** is an all-in-one beat sculpting plug-in for the modern beat maker. Beatformer allows users to effortlessly shape their beats, without compromising their character and musicality. You can use **Beatformer** in every beat track, either you want transparent or extreme sound manipulation. The plugin has four intuitive controls (Boom, Punch, Squash and Air) that offer powerful Digital Signal Processing in a delicate design. With more than a dozen high-quality algorithms under the hood, **Beatformer** opens up a wide range of musical beat shaping possibilities.

“In accusonus, we believe that as technology is evolving beat making must become more intuitive and inspiring. Music creation is all about creativity and when our users are “in the zone”, they need fast workflows.” says Alex Tsilfidis, CEO of accusonus. “With **Beatformer** we offer advanced technology in an intuitive user interface. This allows us to facilitate the fast workflows of our users but at the same time to preserve character and musicality. We think of **Beatformer** as the perfect companion to **Regroover**, our flagship drum loop un-mixing plugin”

Use Beatformer to:

- Glue your drum mix together
- Bring energy into overprocessed loops
- Easily enhance your beat’s dynamics
- Add colour and personal character to your beats
- Add substance to thin sounds
- Instantly transform the sound of your beats
