

FOR IMMEDIATE RELEASE

New iOS App : Mauvio by Accusonus - make your mobile videos sound professional using simple sliders! (iPhone & iPad)

Massachusetts, U.S. (May 26, 2020) - [Accusonus](#) announce the release of [Mauvio](#), an intuitive iOS app for mobile video creators. Mauvio helps you take the sound of your mobile videos to the next level, with minimal effort. It can be used in parallel with any video editor/app. This enables you to create professional video content from scratch, wherever you are!

Creative video ideas spark at anytime and in any place. Thankfully, our smartphones are multi-media powerhouses with multi-camera setups and advanced video algorithms. But what about audio, the other 50% of your video?

Meet Mauvio, the sound studio in the palm of your hand. Mauvio brings Accusonus' professional audio tools to mobile video editing. Use Mauvio to improve the recorded sound of your video with filters that only have one control.

Click [here](#) to try Mauvio on your own mobile videos!

How it works

- Import a video to Mauvio or record a new one directly through the app
- Use Mauvio's one-slider filters to instantly repair & enhance your audio
- Save the video to your Library or share it directly to social media and other video editing apps!

Mauvio : What's Included

Mauvio currently has 4 filters (more coming soon) :

- **De-noise** | Bring down the noise - Instantly reduce background noise (air conditioners, computer fans, busy roads, and machinery or electric noise like hum, buzz and hiss.)
- **Balance** | Loud and clear - Balance out your video's uneven audio levels of speech, for more intelligibility. Maintain volume consistency throughout your video.
- **Enhance** | Add "colour" to your sound - Use the "Enhance" filter to shape your vocal tone and achieve broadcast-quality results. Give your content that "professional" touch, with a simple slider!
- **Volume** | There's also a **volume** control which allows you to intelligently boost or reduce the loudness of your video, without compromising the audio quality.

These filters allow you to instantly boost the quality of your voice.

Accusonus is committed to bring professional audio quality to mobile video creators. More filters and new creative features will be added to Mauvio in the next months!

Press Kit

For Mauvio product images & in app screenshots, please click [here](#). (a .zip file will start downloading)
